

BOOSTER SEATS should be used for kids over 40 lbs who do not fit correctly in adult seat belts.

Every Utah child up to age 8 must be in a child safety seat or booster seat.

**High Back
Belt-
Positioning
Booster**

(Use if your vehicle seat has a low back, like a bench seat in a van.)

Position the lap belt snugly over hips or upper thighs and the shoulder belt snugly across the chest & shoulder.

**Backless
Belt-
Positioning
Booster**

- Safety Belt Fit Test (for kids over 8):**
Your child is ready for the seat belt when:
- 1) Knees bend over seat edge with child sitting all the way back on seat
 - 2) Lap belt lies on upper legs or hips
 - 3) Shoulder belt lies on shoulder/collarbone
 - 4) Child can sit that way for entire trip

You must use BOTH lap & shoulder belts with booster seats.

Let's keep all kids safe while traveling in vehicles!
